

CAMEO

The logo for CAMEO features the word "CAMEO" in a white, bold, sans-serif font. The letter "O" is replaced by a white circle with a gap on its left side, which is positioned behind the letter "E". The entire logo is centered on a dark teal background with a fine, light teal grid pattern.

OUR ASSET REPAIR SERVICE

ADISA Standard collections

Delivering the difference since 1989.

All services guaranteed in house

Here at Cameo we understand the added pressures that the current climate brings. At the forefront for most businesses in this time of crisis is cash management, particularly cutting additional costs where possible. Our 'Asset Repair' service is a sustainable and cost effective process that eliminates the need for spending on new devices, with the potential to bring damaged assets back to life. By repairing responsibly and securely, the need for brand new items is mitigated, lessening the amount of CO2 produced by IT manufacturers. So remember we're here 24/7 to collect, protect, repair and return.

Our Process

Stage 1

An asset list will be sent to Cameo prior to collection. Clearly stating serial numbers and models numbers.

Cameo will carry out an ADISA standard collection.

Assets arrive at the warehouse.

All assets are cross checked against the initial asset list and marked as arrived.

Any accessories present will be marked on the report.

Assets are now ready to undergo the initial triage.

Stage 2

The testing team will carry out the initial triage which entails a visual external check.

Any damage found is reported on the report and made clear by marking the cell red.

Stage 3

After all the assets have completed the initial triage, they go onto full testing.

A full diagnostic is completed on the asset.

Any damage found is noted on the report and made clear by marking the cell red.

Assets are segregated and noted as NFF (no fault found), BER (beyond economic repair) or with the repair required.

Stage 4

Any assets under the NFF category will be cleaned and moved awaiting despatch, along with the BER assets.

Any assets needing repair will now undergo repair as per the report comments. Once completed these will be cleaned and moved with the NFF assets as awaiting despatch.

All assets will now have a final quality control visual inspection, and a report creating if required.

An asset list will be created and all assets are now ready for return.

Brands we repair

Mobiles	Tablets	PC's	Laptops	Networking	Server	Drives	Tape Drives
  	   	       	       	      	        	 	 LTO-4 LTO-5 LTO-6 LTO-7 LTO-8
